**BITOU MUNICIPALITY - NERSA APPROVED TARIFFS FOR : 2022 - 2023, 2023 - 2024, 2024 - 2025 FINANCIAL YEARS**

		Current Tariffs: 2021 - 2022	Budget Year: 2022 - 2023	% Increase/ (Decrease)	Budget Year + 1: 2023 - 2024	% Increase/ (Decrease)	Budget Year + 2: 2024 - 2025	% Increase/ (Decrease)
<p><b>Note on Tariff circuit breakers:</b> Due to international standardisation the 30A , 45A and 60 A circuit breakers are becoming unavailable. As a result the new standard circuit breakers will be 32A, 40A and 63A. Thus where reference is made to 30A this will also refer to 32A, and 45A to 40A, and 60A to 63A.</p>								
<b>1.1</b>	<b>Domestic Consumer Tariffs</b>	<p>This tariff covers the supply of electricity for domestic use in private dwellings, flats and chalets including accommodation establishments with three or less bedrooms, with separate meters and includes churches, welfare buildings, registered schools, crèches, hospitals, halls, sport clubs or similar premises with circuit breaker sizes not in excess of 60Amp single phase or 60Amp three phase. Should Consumers require supplies in excess hereof, the Commercial Consumer or Bulk Supply tariff will be applicable. A rebate of 10% will apply to schools and crèches.</p>						
(a)								
<b>1.1.1</b>	<b>Prepaid Meters</b>	<p>The practical implementation of the Inclining Block Tariffs (IBT) for prepaid meters is based on the number of units purchased during a calendar month. Any purchases made during the calendar month will be calculated by the vending system in accordance with the IBT rates. If the consumer purchases more than once in a month, the previous purchases will be taken into account when the rate for the additional units is determined. Due to the inclining rates, it will not be beneficial for a consumer to purchase much more than the required monthly consumption. At the end of the month, the system resets and the first purchases in the next month is at the Block 1 rate. If a consumer does not purchase any units in a full calendar month/s, this will not affect the rates of the next purchase in a calendar month thereafter. Consumers will be responsible for all costs relating to the conversion from conventional to prepayment metering.</p>						
(a)								
<b>1.1.1</b>	<b>Lifeline</b>							
(a)	<b>These consumers, who reside in sub-economic areas, receive the first 50kWh (Block 1) purchased per month for free.</b>							
<b>1.1.1.1</b>	<b>Lifeline 0- 30A</b>							
(i)	Block 1: 0 - 50kWh	R 1.16710	R 1.25430	7.47%	R 1.34800	7.47%	R 1.44870	7.47%

1.2	Conventional meters											
(a)	For the purposes of the implementation of the IBT for the conventional meters, the billing period on which the IBT charges will be applied, means the period between successive monthly meter readings (normally between 25 and 36 days), irrespective of whether such readings are taken on the last day of the calendar month. Estimated charges are raised during months during which no meter readings can be taken, which is normally based on the previous month's consumption.											
1.2.1	Single Phase											
(a)	The existing consumers with 80A and 100A single phase circuit breaker sizes are being phased-out in line with NERSA's requirements. Their Basic Charge will be increased annually up to eventually the same value as that of a 60A three phase circuit breaker. It will therefore be advantageous for these consumers to either convert a 60A single phase supply or a 30A or 45A three phase supply, if possible.											
1.2.1.1	15A to 32A											
(i)	Basic Charge (Per Month)	R	333.06	R	357.94	7.47%	R	384.68	7.47%	R	413.41	7.47%

<b>1.3</b>	<b>Small Scale Embedded Generation</b>											
(a)	SSEG refers in this instance to consumers who wish to fit various renewable energy sources (Wind, Solar etc) to supplement their energy consumption by harvesting solar energy for their own use. These systems are generally Grid Tied to the municipal network allowing the consumer to draw energy (electricity kWh or Units) from the municipal network when their renewable plant does not produce enough energy for their use. In the opposite case where the renewable plant is producing more energy than the consumer is using, there is the option to feed this excess energy back into the municipal network to which the consumer receives credit for supplying electricity back into the grid.											
(b)	All consumers must make application to the municipality via the Electrical Engineering Department on the prescribed form. This must comply with the municipal regulations as published. The applicant will be required to sign a contract with the municipality to ensure all conditions are met. Additional cost might applied for the upgrading of infrastructure based on the normal conditions of upgrading of a supply											
(c)	The consumer must change to the tariff structure below. It must be noted that this tariff will only be available when council approves it SSEG											
(d)	The consumer must fit a "4-Quadrant" electricity meter with a modem to the municipalities specification to enable the billing to be properly applied, which will be read remotely.											
(e)	The consumer will have to maintain a net consumer of energy in the year as no cash will be paid to the consumer											
(f)	All installation work is to comply with SANS10142-1 Rev 2, and any new regulation that may be published. A copy of a valid Certificate of Compliance must be issued by a registered electrician, and submitted to the Electrical Engineering Department											
(g)	Only for customers with a plant rated under 1MW											
(h)	A sign must be placed outside the property to indicate that the premises generates electricity											
(i)	This tariff will only be applicable after council approves SSEG policy

<b>2.0</b>	<b>Commercial Consumer And Temporary Supply Consumer Tariffs</b>							
(a)	This tariff is for shops, office buildings, hotels, including accommodation establishments with four or more bedrooms, single residential properties utilised for business purposes, clubs (excl. sport clubs), industrial undertakings, temporary supplies, or similar premises with circuit breaker sizes not in excess of 60Amp single phase or 100Amp three phase. Should Consumers have supplies in excess hereof, the Bulk Supply tariff will be applicable.							
<b>2.1</b>	<b>Prepaid Meters</b>							
(a)	The total Service Charge payable at each transaction is calculated using the number of days between the previous and present purchases. Consumers will therefore find that they do not receive the same amount of kWh for the same rand value if the number of days between purchases varies.							
<b>2.1.1</b>	<b>Single Phase - 60A</b>							
(i)	Basic Charge (Per Day)	R 33.84	R 36.37	7.48%	R 39.09	7.47%	R 42.01	7.47%
(ii)	Energy charge [R/kWh]	R 2.01720	R 2.16790	7.47%	R 2.32984	7.47%	R 2.50388	7.47%

<b>3.0</b>	<b>Bulk Supply Tariffs</b>							
	The Bulk Supply tariff is for Consumers with a notified maximum demand of 60kVA or more or who require a supply greater than a 100Amp three phase circuit breaker size. The Notified Maximum Demand (NMD) is the maximum demand notified in writing by the Consumer and accepted by the Municipality.							
(a)	Customers who exceeds their notified maximum demand (NMD) will be penalised. This will be based on the actual maximum demand measured in kVA during the billing month, which therefore changes on a monthly basis depending on the customer's actual usage.							
(b)	Consumers will be exempt for the first two events or any two events that are within 5% of the NMD.							
(c)	On the third event or for any other event where the NMD is exceeded by greater than 5%, a fee will be charge based on "Amount exceeded x R/kVA x event number"							
(d)								
<b>3.1</b>	<b>Normal Bulk</b>							
	The Network Demand Charge is payable per month for the demand supplied (maximum demand reading). The Network Access Charge is payable per month based on the highest of either the notified maximum demand (min. 60kVA) or the highest maximum demand reading during the previous 12 months.							
(a)								
<b>3.1.1</b>	<b>Low voltage (&lt; 500V)</b>

<b>3.2</b>	<b>Time of Use (TOU)</b>							
	<p>The TOU tariff is for Consumers with a minimum notified demand of 60kVA or who require a supply greater than 100A three phase circuit breaker size, and who are able to manage their energy consumption according to Eskom's specified time schedule, i.e. Peak, Standard and Off-Peak for the "Megaflex" tariff. The TOU tariff will only be available to residential developments with a bulk supply after 60% of the erven inside the development have been built on and occupation of the houses have been taken. This tariff is based on the Eskom "Megaflex" tariff, except that there is a single Basic Charge and Eskom's various kWh charges are included in one Energy Charge. The Network Demand Charge is payable per month for the demand supplied (maximum demand reading) during peak and standard periods. No Network Demand Charge is payable during off-peak periods. The Network Access Charge is payable per month based on the highest of either the notified maximum demand (min. 60kVA) or the highest maximum demand reading during the previous 12 months. The charge is applicable during all time periods. The Reactive Energy Charge is applied to kVAh in excess of 30% (0,96 Power Factor) of kWh recorded during peak and standard periods. The excess reactive energy is determined per 30 minute integrating period and accumulated for the month and will only be applicable during high-demand season. The difference between the Low and High Voltage charges is 5% and in line with Eskom tariffs. The following conditions are applicable to the TOU tariff: <b>(i)</b> Consumers with a minimum notified demand of 60kVa, and who are able to manage their energy consumption according to Eskom's specified time schedule, i.e. Peak, Standard and Off-Peak, for "Megaflex" tariff. <b>(ii)</b> Consumers must have the necessary electronic metering equipment installed and correctly programmed for this tariff at their cost. <b>(iii)</b> Where existing Consumers consider conversion to TOU, it will be the consumers' responsibility to do a tariff study. <b>(iv)</b> At least 6 months TOU data (3 x high demand season and 3 x low demand season) must be available before the conversion can be implemented. <b>(v)</b> A change of tariff will apply for a minimum period of 12 months with three months mutual notice thereafter.</p>

<b>4.5.14</b>	<b>Penalty for Illegal electricity connections</b>  A penalty for connecting illegally to a municipal electric main will be billed to the customer who benefited from illegal connection. This penalty fee is in addition to the calculation of the average consumption of electricity units consumed, for the period defined in the municipal bylaws. If for any reason the credit meter cannot be read, municipality may render an estimated account. If any calculating, reading or metering error is discovered in respect of any account rendered to a consumer, the error shall be corrected in subsequent accounts, any such correction shall only apply in respect of accounts for a period of 6 months preceding the date on which the error in the accounts was discovered, and shall be based on the actual tariffs applicable during the period.

<b>3.10.4</b>	<b>General Points</b>								
(i)	Private - Private residents with clean garden and builders rubble generated in normal personal and household activities.								
(ii)	Other users - Any other person or entity with clean garden or builders rubble generated due to economic activities.								
(iii)	Garden waste to be bagged in bags or tied in bundles not longer than 1.2 m. Garden waste material may not exceed 60 mm in cross section.								
(iv)	Domestic solid waste defined as waste (excluding garden waste and builders rubble) generated from personal and household activities.								
(v)	Garden solid waste defined as superfluous vegetation (exceeding 60 mm in cross section) generated by gardening activities.								
(vi)	Non-domestic solid waste defined as waste, excluding mechanically compacted waste, which is neither residential waste, garden waste, medical waste nor industrial waste.								
(vii)	Industrial solid waste defined as waste, excluding mechanically compounded waste, generated by a manufacturing, industrial or fabricating facilities activities.								
(viii)	Clean builders rubble defined as waste consisting of broken bricks, sand, stone, cement, plaster and similar inert materials, but excluding paper, plastic, wood, glass and metal. Clean builders rubble is utilised for constructing temporary roads on disposal sites and should therefore not damage vehicle tyres.								
(ix)	LDV - Bakkie - carrying capacity not exceeding one ton								
(x)	Trailer - Carrying capacity not exceeding 3 ton.
