### **Legislative Framework**

#### PART 1 – IN-YEAR REPORT

# Section 1 – January Report

### 1.1 In-Year Report - Monthly Budget Statement

The report outlines the financial performance and position of the municipality for the month ended January 2024. The budget of the municipality is compiled with the objective that Bitou Municipality remains a financially viable and sustainable institution. The latter could be achieved if the municipality spends its budget prudently.

The financial viability is measured through the liquidity ratio, current ratio and quick ratio. These ratios are critical in terms of evaluating the ability of the municipality to meet its short-term obligations.

As can be seen on the C7 Cash flow statement, the current cash, and cash equivalents as at end of January 2024 amounts to R118.4 million, however the trial balance shows an amount of R347.4 million. This is mainly due to the migration of the bank reconciliation to the modernised financial system; the matter is currently being addressed by the service provider and the municipal staff. The municipality on average requires an amount in excess of R65 million to cover its monthly operational expenditure, this includes the cost associated with the payment of employee cost and suppliers. It however excludes payments made to suppliers for capital assets.

### **Revenue by Source**

### **Property Rates**

Property rates for the month amounts to R14.6 million. When comparing the YTD actuals with the YTD budget, the revenue source is adequately performing. This can mainly be ascribed to the removal of rebates to customers with a property value above R1 million and the reduction in the rebate amount to individuals whose property value is between R350 000 and R1 million, coupled with the annual rates levied.

### **Electricity**

YTD Revenue from electricity amounts to R134.8 million. Anticipated budgeted revenue amounted to R141.1 million, this represents an under-performance of 4%. Electricity revenue is influenced by fluctuating consumption during peak and off-peak periods. This revenue item has been considered for adjustment as part the Mid-year adjustments budget process.

### **Water Service**

It should be noted that when this revenue item was budgeted for, an anticipated number of 3500 indigents were considered. ### **Capital Expenditure Analysis**

Capital Expenditure for the month amounts to R 1.0 million.

It should be noted, as a matter of concern, that the spending on human settlements is worrying as the allocated budget amounts to R24.7 million and spending is only at R 683 254. Recently we received the revised allocation letter where an additional R 9.2 million has been gazetted to Bitou for Human settlements. Based on this and the current spending it appears unlikely that we will fully spend on this capital project.

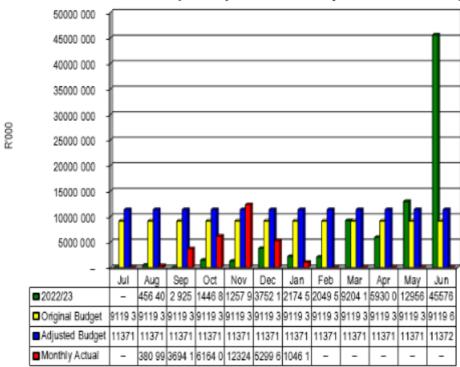

The Municipality also received a letter to stop funding on INEP for the remainder of the tranche still due to us due to underspending. Should Treasury not find our response favourable, it will add additional pressure on our own funding to replace the reduced grant funding. It is crucial to prioritise spending on grants as historic trends in slow spending has shown us that departments tend to go for rollover applications process as they did not fully spend on their projects and these applications, at times, get rejected.

It should also be noted that the commitments (shadow balances) loaded on the FMS amounts to R35.6 million, which translates to 26% of the total capital budget still being under commitments. If these commitments materialise, the Municipality will be within the 50% spending bracket as anticipated.

The table above reflects the statement of financial position of the municipality. The total current assets at the end of January 2024 amounts to R741.5 million. The municipality reports total short-term investments at R 98.9 million and cash of R19.8 million for the month. The municipality reports a positive cashbook balance of R19.8 million.

The current liabilities for the month amounts R580 million. The current ratio for the month equates 1.28:1, which is below best practice norms. However this is not a true reflection as the anomalies mentioned previously skew the picture of the ratio and once resolved will have a better outlook. The higher the current ratio, the more capable the municipality will be to pay its current or short-term obligations.
